

I am writing to voice my opposition to the consideration of  
Broadband over power  
line by the FCC.

BPL has the potietial to serverly impinge on the usefulness of what  
has just been recognized by the Department of Homeland Security as  
America's first line of first responders, amateur radio operators.  
The inference from BPL has the demonstrated potential to reduce the  
useful range of HF communication to the point that it should be  
considered a threat to national security.

Sincerely,  
B. Scott Lovell, KB1GYQ  
Danielson, CT
